

Day 1: Tuesday, June 20th 2017**07.00 Registration Opens****08.15 FinTech Network Opening Address***Dean Murphy, Director, FinTech Network***08.20 Chairman Opening Remarks***Nick Giurietto, CEO & Managing Director, Australian Digital Currency & Commerce Association***Section 1: Blockchain Strategy – Embracing New Approaches****08.30 Blockchain Risk Management**

- Assess the regulatory risks associated with blockchain and how internal controls could be compromised or enhanced through adoption
- Hear the concerns associated with customer data on the blockchain and how records are handled to ensure that data is not compromised by unauthorised parties
- See how blockchain could affect both internal and external risks within your organization to ensure you are fully aware of potential challenges moving forward

*Andrew Koh, Deputy Chief Manager - Risk Management, China Construction Bank***09.00 Embracing Innovation for Change – How MUFG is Leveraging Blockchain for Growth**

- Hear MUFG's views on blockchain and how the financial services group is positioning itself to take advantage of this technology for its business, with a spotlight on its global blockchain initiatives
- Learn how MUFG is utilising blockchain to improve its services for corporate and retail customers
- Review the potential challenges that could lie ahead with blockchain adoption and how to mitigate them with a thorough approach to implementation

*Mike Truter, Deputy General Manager - Asian Systems Office, Bank of Tokyo-Mitsubishi UFJ***09.30 Spotlight on Blockchain in Singapore**

- Review the communal and in-house projects being undertaken by financial institutions in Singapore to see how this technology is likely to disrupt the current environment
- Assess how blockchain can change the whole banking landscape and the difficulties that will need to be overcome to disrupt mindsets and legacy systems
- Understand the importance of education around distributed ledger architecture and how companies must adapt and be open to change

*Moderator: Floyd D'Costa, Co-Founder, Blockchain Foundry**Altana Widjaja, VP Fintech and Innovation Group - The Open Vault, OCBC Bank**Stanley Yong, Deputy Director, Monetary Authority of Singapore**Ganesh Iyer, SVP – Market and Product Development | HSS Singapore, HSBC***10.30 Coffee Break****11.00 Mizuho's Blockchain Outlook**

- Understand how blockchain fits into the wider digital strategy being implemented within Mizuho and how they envisage this technology being a part of their future
- Assess some of the POC's and use cases that have been developed by Mizuho and the areas where they see the most potential for blockchain technology within their business
- Discuss some of the challenges regarding platform choices and the permissioned vs private debate to understand the potential drawbacks or hurdles of implementing this technology

Ikuma Ueno, Digital Strategist - Digital Innovation Department, Mizuho Financial Group

11.30 Nordea's Digital Strategy & Approach to Blockchain

- See how emerging technologies are shaping the future of finance and how Nordea Bank see blockchain being part of their business
- Assess some of the tangible use cases around KYC and trade finance that Nordea are facilitating to help assess their viability for organisations across financial services
- Blockchain cannot be fully utilised in isolation: Understand the importance of collaboration to ensure the blockchains full potential is realised

Piotr Piskorski, Head of IT Strategy and Enterprise Architecture, Nordea Bank

12.00 Blockchain's Potential Role in Payment Modernisation

- Address the drivers for change in payments and the areas of opportunity to modernise and improve efficiencies
- Understand more about BNY Mellon's research into emerging payment technologies and the role that blockchain may be able to play within this
- Review the ways that BNY Mellon sees blockchain's potential to provide a faster, cheaper and more transparent payment system and the adoption/scale challenges that are envisaged

Sindhu Vadakath, Asia Payments Product Line Manager, BNY Mellon

12.30 Integrating Blockchain Solutions Into Your Digital Platform

- Assess the ways that public blockchains can be utilised for cross-border remittance and improve the customer experience especially for financial institutions with limited global network
- See how Streami and Shinhan Bank have tried to overcome the challenges of integrating a blockchain solutions into the customer's mobile banking app
- Review which challenges remain, how they are trying to tackle them, and what the implications are for the banks' blockchain innovation

Junhaeng Lee, Founder, Streami

13.00 Lunch Break**Lunch & Learn: 13.15 – 14.15****How Blockchain Technology is Transforming Trade Finance in Asia Pacific**

- Debate ways that blockchain can improve trade financing in the Asia Pacific and where it can replace or enhance existing processes
- Assess which banks have already started using blockchain to improve trade finance in Asia with a focus on TradeSafe, Letter of Credit, Cotton Shipment and Invoice Processing
- Review the challenges that need to be overcome in areas such as technology standardization and interoperability, regulation, talent and industry commitment for trade finance implementation

Aurélien Menant, Founder & CEO, Gatecoin

14.30 Panel Discussion: Blockchain for Insurance

- Understand where blockchain could play a vital role in optimising current processes in insurance and how a decentralised approach could help improve security and trust
- Hear how insurers are working to modernise their organization through the adoption of digital solutions and the role that blockchain is likely to play in this
- Assess some of the recent use cases and proofs of concept that are being developed for insurance to comprehend the opportunities that lie ahead for the sector

Moderator: Pavel Bains, CEO, Bluzelle

Vincent Serpoul, Lead Engineer @LOFT, Manulife

Bob Crozier, Associate Director, AIA Edge (Innovation Team), AIA Group

Ahed Abdelky, Financial Crime Technology Expert, Allianz Group

Subhajit Mandal, Director Innovation, MetLife Innovation Centre

Section 2: Regulatory & Market Environment**15.30 Blockchain: The Challenge of Intellectual Property**

- Discuss the challenges that the recent influx of patent filings may have on the rest of the financial services sector as companies continue to move forward with blockchain developments
- Debate how the coming together of organizations through multiple consortia to develop, test and deploy blockchain solutions could throw up legal and licensing issues
- Consider how a level playing field between blockchain vendors and service providers could help advance the blockchain evolution within financial services

Stanley Yong, Deputy Director, Monetary Authority of Singapore

16.00 Coffee Break**16.30 Creating International Standards for Blockchain**

- Understand the importance of developing international standards to avoid defecto standards based on large players coming in and ruling the market
- Inform, shape and influence the future direction of international standards to support the rollout and deployment of blockchain technology
- See how blockchain standards will play a key role in creating greater market certainty and confidence while supporting regulation of financial transactions, commodity exchanges and asset transfers

Damian Fisher, Senior International Development Manager, Standards Australia

17.00 Blockchain and Innovation: Navigating the Legal and Regulatory Landscape

- Introduce the use cases of blockchain and the key legal implications and pit falls
- Understand the regulatory implications and approaches to blockchain adoption
- Consider how blockchain has the potential to disrupt the legal landscape in areas such as anti-money laundering and enforcement of contractual rights

Peiyong Chua, Counsel, Financial Regulation, Singapore, Linklaters

17.30 Blockchain Market Overview

- Study the global blockchain sector and assess latest investments, trends and market movements to stay on top of latest developments that could affect your organization
- Examine several blockchain start-ups in the Asia Pacific region that are offering new solutions to the finance sector and assess their viability for your business
- Review several blockchain use cases being tested by financial institutions around the globe to stay abreast of latest developments in this burgeoning market

Harmeet Singh Monga, Chief Business Officer, BlockSmiths

18.00 Networking Drinks Reception**19.00 End of Day 1**

Day 2: Wednesday, June 21st 2017**07.30 Registration Opens****08.20 Chairman Opening Remarks***Anson Zeall, Chairman, ACCESS***08.30 The German Regulatory Approach to DLT/Blockchain**

- Review the most pressing questions surrounding blockchain from a licensing perspective
- Address the technical bases and use cases/scenarios that BaFin see for blockchain
- Understand the impact that blockchain will have on existing institutions and market participants from an outsourcing, KYC and risk management viewpoint

*Jens Münzer, Senior Officer, Federal Financial Supervisory Authority***Section 3: Blockchain Use Cases & Technology Hurdles****09.00 Building the Blockchain Business Case**

- Assess why the business case for blockchain is still a little opaque within some financial institutions and pinpoint areas where more clarity could help illustrate its pros and cons
- Consider why companies should continue to explore blockchain and how to leverage the commercial opportunity to help evaluate whether the prize is worth the initial investment
- Tackle the unknowns and business challenges associated with blockchain adoption that concern financial institutions to ensure all trepidations are properly addressed

*Antony Lewis, Director of Research, R3***09.30 Panel Discussion: Utilising the Blockchain for Clearing and Settlement**

- Discuss the pros and cons of utilising blockchain for clearing and settlements and how it could circumvent the reliance on intermediaries
- Assess the ways a distributed ledger system could help mitigate the risks of fraud and lead to easier access to trade finance, lower interest rates and ultimately greater liquidity
- Debate how a streamlined clearing and settlement approach using blockchain technology could help to overcome regulatory hurdles

*Moderator: Lon Wong, Founder, Dragonfly Fintech**Boon Chan, Director, Head of Market Advocacy APAC, MENA, Deutsche Bank**Masafumi Kondo, Senior Business Analyst - JPX Fintech Laboratory, Japan Exchange Group**Michele Curtoni, Strategy Manager, Global Technology Innovation, London Stock Exchange Group***10.30 Coffee Break****11.00 Panel Discussion: Data Ownership & Anonymity on the Blockchain**

- Hear how blockchain can help customers take charge of their own data and the pros and cons this could have within financial services
- Assess the ways that distributed ledger technology can support proof of ownership and how the finance sector could utilize this
- Debate how anonymity could help or hinder current processes and why each blockchain will have its own rules governing the amount of verification required

*Moderator: David Moskowitz, CEO, Attoreo**Adrian Fisher, Counsel, TMT, Singapore, Linklaters**Paul Lee-Simion, Innovation Director, UBS**Jaiveer Singh, Head of Innovation Sub-Committee, ACCESS*

12.00 Metaverse: A Blockchain Platform of New Digital Finance

- Understand the importance of Digital IDs
- Review the benefits of smart properties rather than smart contracts
- Assess the application of blockchain on art heritage and online medical to see how this technology is helping to revolutionise other sectors

Eric Gu Ying, Founder, [Viewfin Metaverse](#)

12.30 Lunch**13.30 Blockchain in Trade and Supply Chain Finance**

- Review the digitization of trade for businesses and how blockchain technology can play a bigger role in the trade value chain
- Assess collaborations at both national and private-sector levels to create a robust and inclusive trade and finance ecosystem
- Reinforcing Singapore's trade relevance in ASEAN, and proponent of open-source technology and ecosystem play

Moderator: Prof Annie Koh, Vice President, Office of Business Development Professor of Finance, [SMU](#)

Eric Wong, Chief Operating Officer, [JEDTrade](#)

Boon Chan, Director, Head of Market Advocacy APAC, MENA, [Deutsche Bank](#)

Yeo Beng Huay, Chief Information Officer, [Singapore Customs](#)

Winnie Wong, Director, [Mastercard](#)

14.30 The Far-Reaching Applications of the Authentication Blockchain

- Hear how blockchain offers a new level of cyber-security resilience in financial networks, normalizing data security risks over multiple networks, geo-political boundaries and between independent parties
- Discuss how a next-generation financial infrastructure that enables contextual banking, consolidated regulatory audit trails and Ricardian contracts can be established using blockchain
- Explore the new business patterns in trustless netting, commercial finance, and reconciliation to ensure you stay ahead of the blockchain curve

Jonathan Hope, CEO, [Keychain](#)

15.00 Coffee Break**15.30 Public Distributed Database for Decentralized Applications on Blockchain**

- Decentralized applications need to store their data somewhere
- Current solutions like static file storages are ineffective for the majority of applications
- We propose fast, public, byzantine fault tolerant noSQL database

Dmitry Kochin, CTO, [Ties Network](#)

16.00 System Challenges: Deployment of DLT

- Address common concerns around performance, scalability, architecture and interoperability to dispel common myths and highlight challenges to ensure you're prepared for blockchain deployment
- Debate whether high volume activities such as fund transfer systems, securities trading systems and post-trade infrastructures are suited for DLT
- Discuss the future scalability challenges such as the requirements for storage, bandwidth and computational power and how you can act now to mitigate risks

Duncan Wong, Vice President of Financial Technologies, [Astri](#)

16.30 Blockchain in Capital Markets

- Discuss the possibilities of blockchain adoption for capital markets and how financial services could benefit from this in pre-trade, trade, post-trade and securities servicing
- Assess several blockchain use cases within capital markets to visualise the benefits and challenges that lie ahead for wide-scale blockchain adoption
- Debate possible blockchain applications to discover the pros and cons of each use to see how this technology could be utilised within your business

*Marcelo Garcia Casil, Co-founder and CEO, **DXMarkets***

17.00 End of Conference
