

Day 1 – Wednesday, June 20th**07:30 Registration and Technology Showcase Hall Opens****07:30 Coffee Available in the Technology Showcase Hall****08:45 FinTech Network Welcome** *Dean Murphy, Co-Founder & Head of Blockchain, FinTech Network***08:50 Chairman Welcome** *Zach Piester, Chief Development Officer, INTREPID Ventures***Section 1: Visions for Blockchain and DLT****09:00 Embracing Innovation for Change – How MUFG is Leveraging Blockchain for Growth**

- Hear MUFG's views on blockchain and how the financial services group is positioning itself to take advantage of this technology for its business, with a spotlight on its global blockchain initiatives
- Learn how MUFG is utilising blockchain to improve its services for corporate and retail customers
- Review the potential challenges that could lie ahead with blockchain adoption and how to mitigate them with a thorough approach to implementation

*Mike Truter, Managing Director - Asian Systems Office, MUFG Bank***09:30 Forecasting the Future for Blockchain in Financial Services**

- Review some of the pain points for financial services to see where blockchain could help alleviate challenges and open new business streams
- Predict how a blockchain-powered future could transform financial services with examples of the latest applications in development
- Hear ConsenSys' vision for the adoption of distributed ledger technology within financial services to help map your digital transformation journey

*Vinay Mohan, Director - Asia-Pacific Operations, ConsenSys***10:00 Creating a Collaborative Environment – JPX's Journey**

- Hear how JPX, as an infrastructure operator, are leading the charge in blockchain adoption and how their consortium approach has aided developments
- Assess the basic functions of 3 core DLT platforms (Hyperledger Fabric, Corda, Quorum) and how they stand up against existing technologies
- Review the two main projects in development around KYC/AML and the post trade processing of listed securities to gauge the value of DLT in these areas

*Masafumi Kondo, Senior Business Analyst - JPX Fintech Laboratory, Japan Exchange Group***10:30 Coffee Break****Section 2: Digital Strategy****11:00 Panel Discussion: Improving Your Digital Strategy**

- Hear how a range of financial institutions see distributed ledger technologies fitting into their wider digital strategy
- Review the key application areas that blockchain and other ledger technologies could disrupt within financial services and how institutions are positioning themselves to adapt
- Examine where blockchain sits amongst the overall fintech movement to understand its importance and applicability alongside other digital solutions

Moderator: *Frederic Giron, VP and Research Director, Forrester**Patcharin Boonlumsun, Head of Digital Solutions, Krungsri**Rasmi Mohapatra, Technology Architect, OCBC Bank**Danielle Henderson, Senior Vice President, Market Advocacy & Innovation Research, APAC, Northern Trust*

11:45 Blockchain: A Maturing Technology

- Consider how you can leverage the commercial opportunity of blockchain and how the technological landscape is shifting
- Assess the common challenges and concerns of moving blockchain projects into production and some of the common pitfalls that you need to avoid
- Discuss whether blockchain is right for you and your organisations or whether other technologies could be more suitable for you

Stan Yong, CTO (Blockchain for financial services) & Global Lead, Central Bank Digital Currency Solutions, IBM

12:15 – 14:00 Lunch**Lunch Workshop 1: Latest ICO's and Tech for Finance****12:40 Pitch 1: Pundi X Project**

- See how Pundi X aim to allow its users to buy, sell and use cryptocurrency as easy as taking MRT with a top-up card
- Hear more about the Pundi X POS terminal (connected to Ethereum and NEM blockchains) allowing developers from across the world to connect with the network of devices and physical outlets
- Understand how Pundi X plans to bring blockchain-based transactions to the next billion users and help to increase the value of cryptocurrency for all users

Zac Cheah, CEO and Co-Founder, Pundi X

13:00 Pitch 2: UTRUST - The Future of Payments with Cryptocurrencies

- What is holding cryptocurrencies as a means of payment in online? What value proposition can overcome this scenario?
- What is driving the next stage of crypto market growth? The rise of revenue-generating use-cases in e-commerce and UTRUST as the PayPal of this crypto and tech generation
- UTRUST technology & product overview - a ready-to-market solution and the path to growth. An innovative crypto-to-cash payment gateway with consumer protection for buyers and volatility protection for merchants

Filipe Castro, Co-Founder, UTRUST

13:20 Pitch 3: How to Bridge Financial and Crypto Markets

- Hear how Zeus Exchange are building a hybrid trading platform that connects conventional equity exchanges and crypto markets
- Learn more about Zeus Depository asset tokenization vehicle
- See how Zeus Exchange are making sure that their fintech platform is secured, compliant and transparent

Olga Duka, CEO, Zeus Exchange

14:00 Virtual Currencies: New Assets in the Digital Age

- Discuss the key questions surrounding cryptocurrencies or 'tokens' to decipher exactly what they are and how they really work
- Debate whether regulators should treat tokens like investment products, stored value facilities, foreign exchange currencies, securities offerings or ban them altogether

Jonathan Horan, Partner, Linklaters

Sophie Mathur, Corporate Partner and Global Co-Head of Innovation, Linklaters

Section 3: Blockchain Applications**14:30 Panel Discussion: Streamlining Trade Finance with DLT**

- Debate some of the key challenges facing the trade finance process currently and where distributed ledger technologies could help overcome some of these challenges
- See how an environment where all participants can communicate on a common platform could cut out fraud, improve data reconciliation and digitise the whole trade finance process
- Hear how financial institutions are planning to use blockchain technology to create value for their customers through trade finance applications

Moderator: *Duncan Wong, CEO, CryptoBLK*

Farooq Siddiqi, Global Head of Trade, Standard Chartered

Joshua Kroeker, Blockchain/DLT Lead, Global Commercial Banking, HSBC

Venkat Kumar, Vice President, Kotak Mahindra Bank

Mohua Banerjee, Senior Director - Infosys Finacle Blockchain, Infosys

15:30 Coffee Break**16:00 Industries Leveraging Blockchain Successfully - Key Applications**

- Hear how blockchain is impacting healthcare and life sciences for managing patient data, clinical trials data and electronic medical records while maintaining regulatory compliance
- Assess ways that decentralized social networks can avoid situations like the Facebook and Cambridge Analytica scandals through better privacy control over content & security
- See how distributed ledgers can create a marketplace for wireless data, allowing carriers to provide better service to the user, reduce call drops and improve overall efficiencies within telecoms

Ankur Maheshwari, Director of Research, Techcracers

16:30 Panel Discussion: The Role of Blockchain in Payment Modernisation

- Address the drivers for change in payments and the areas of opportunity to modernise and improve efficiencies
- Discuss the latest use cases around payments/remittances and whether blockchain is fulfilling its promise of providing faster, lower-cost transactions
- Debate whether a stronger and more substantial consensus method is needed to provide a blockchain underpinned rail between financial institutions

Moderator: *Dharmesh Desai, Senior Vice President – NRI, Digital Strategy and Strategic Alliances, IIFL Holdings*

Sai Valiveti, Vice President, Global Technology, J.P. Morgan

Sagar Sarbhai, Government & Regulatory Relations Lead for APAC & Middle East, Ripple

Ella Qiang, Director of Partnerships, Stellar

17:30 Chairman's Closing Remarks *Zach Piester, Chief Development Officer, INTREPID Ventures*

17:40 Networking Drinks Reception

19:00 End of Day 1

Day 2 – Thursday, June 21st**08:00** Registration Opens**08:00** Coffee Available in the Technology Showcase Hall**08:50** Chairman Welcome*Shane Brett, CEO, GECKO Governance***Section 3: Blockchain Applications Continued...****09:00** Is Blockchain The Right Solution for You?

- Evaluate some of the Blockchain solutions in production and their success in tackling issues within financial services
- Address major misconceptions with regards to using Blockchains and distributed ledgers and benefit from a step-by-step analysis to ensure blockchain is the right solution for your business
- Survey Blockchain alternatives, such as Hashgraph, Tangle and Spanner, to learn how the technology has evolved to be more efficient and scalable

*Adil Haris, Technology Consultant, Blockchain Technology Malaysia***09:30** Panel Discussion: Utilising the Power of DLT in Post-Trade

- Debate the opportunity and risks of reduced regulatory reporting through the deployment of private blockchains in post-trade
- Discuss the ways that DLT can help modernise, streamline and secure administrative functions as well as eliminate errors and lower operational costs within post-trade
- Review the technical challenges around scalability and how continued testing and development is essential for the future use of DLT in post-trade

*Moderator: Alexandre Kech, Head of Securities & FX Markets, Asia Pacific, SWIFT**Danielle Henderson, Senior Vice President, Market Advocacy & Innovation Research, APAC, Northern Trust**Jon Rout, Business Development Director, APAC, Digital Asset**Margaret Harwood-Jones, Global Head of Securities Services, Standard Chartered**Gangesh Ganesan, President and Chief Technology Officer, PeerNova***10:30** Coffee Break**Section 4: Blockchain for Insurance****11:00** Utilising Blockchain for Health Insurance

- Assess how LumenLab plans to improve customer experience and reduce claim times by processing health insurance claims that utilise smart contracts
- Understand why Ethereum was the platform of choice for this project and the journey that LumenLab took before making this decision
- See how this project could help in areas of parametric underwriting and how blockchain technology can be used within other areas of insurance

*Subhajit Mandal, Director Innovation, LumenLab: MetLife Innovation Centre***11:30** Panel Discussion: Can Insurance Benefit from Blockchain?

- Review the latest use cases and POC's under development for insurance and how they are helping to modernise the way insurers operate
- Address the cost of integrating blockchain solutions into current infrastructure and the challenges that will need to be overcome by insurers to execute this
- Discuss ways insurers can utilise blockchain technology to create new products and financial instruments in turn establishing new commercial opportunities

*Moderator: Ashok Venkateswaran, Director Sales and Product Development, Bluzelle**Vincent Serpoul, Lead Engineer @LOFT, Manulife Asia**K V Dipu, President & Head of Operations, Bajaj Allianz General Insurance Company**Subhajit Mandal, Director Innovation, LumenLab: MetLife Innovation Centre**Val Yap, CEO, PolicyPal Network*

12:30 – 14:00 Lunch**12:45 – 13:45****Lunch Workshop 2: Blockchain in Banking & Finance**

- What is blockchain?
- How financial & banking industry can benefit from blockchain technology?
 - Fraud Reduction
 - Identity management & Know your Customer (KYC)
 - Smart Contracts
 - Payments
 - Trading Platforms
 - Loyalty & rewards programs
- Hurdles to blockchain implementation for financial & banking industry

*Julian Hosp, Co-Founder & President, TenX***Section 5: Blockchain Applications Part 2****14:00 Blockchain Financial Inclusion Use Case**

- Understand more about the 2 million unbanked adults in the world and the 72% of ASEAN citizens who are without bank accounts to realise the opportunity this presents
- Hear how DLT can help you tap into “Dead Capital” trapped within farmers livestock to help these individuals to gain access to alternative financing
- Assess how Sentinel Chain offers a new way of solving the financial inclusion problem by combining livestock provenance to create collateralizable loans via blockchain

*Roy Lai, CEO & Founder, Sentinel Chain***14:30 Behind the Trend: Building Real-World Applications on Blockchain**

- Hear an overview of two concrete use-cases using a blockchain; commercial registration that reduced the time to register a new company in Switzerland from several weeks to less than two hours and the registration of University diplomas on blockchain
- Take a look at Proxeus’ projects pipeline to understand the broad areas of application for blockchain and appreciate the possibilities for this technology
- Examine and understand some of the new business models made possible by the blockchain and how this will disrupt the status quo

*Antoine Verdon, Co-Founder & CEO, Proxeus***15:00 Future Role of Escrow and Custody in the Digital Asset Era**

- Consider what infrastructure areas are missing that would make the financial services sector more comfortable using crypto assets
- Debate what it would take to encourage financial institutions to buy into crypto assets and the risks that are holding back approval
- Understand how the future role of qualified escrow and custody will look within a crypto economy helping to safeguard crypto assets

*Vincent Chok, CEO, Legacy Trust***15:30 Coffee Break**

16:00 Panel Discussion: Can Blockchain Solve KYC & AML Challenges?

- Debate the impact that a digital identity could have in areas such as KYC and AML as well as the ethical, data protection and privacy issues
- Working beyond the technology: How do we get companies with differing processes to use the technology in a way that works for all
- Question whether blockchain is the right technology to improve KYC processes and the limitations it could have for customer due diligence

Moderator: *Sophie Mathur, Corporate Partner and Global Co-Head of Innovation, Linklaters*

Rasmi Mohapatra, Technology Architect, OCBC Bank

Jennifer Doherty, Asia Head of Innovation - Global Liquidity & Cash Management, HSBC

Antony Lewis, Director of Research, R3

16:45 A Legal and Regulatory View to Blockchain, DLT and related technologies in Wholesale Banking

- Highlight the potential for virtual currencies, ICOs, digital trade documents and other applications of blockchain and distributed ledger technologies
- Assess the regulatory considerations surrounding these areas, the deployment of DLT technology and how different markets are responding to change
- Debate the ways that industry can help to shape future risk-managed growth in collaboration with regulators and the ways you can prepare

Boon Chan, Director, Head of Market Advocacy APAC, MENA, Deutsche Bank

17:15 Chairman's Closing Comments

Shane Brett, CEO, GECKO Governance

17:20 End of Conference
